Abdulla Ali Abdulla AlNuaimi

Field Maintenance Company Commander

PROFESSIONAL SUMMARY

Results driven leader with a Bachelor's in Mechanical Engineering and 7+ years of aviation maintenance excellence, specializing in fleet readiness, operational oversight, and human capital management. Proven track record managing the operational readiness of 60+ aircraft and leading 200+ technicians across multiple disciplines, including production control, quality assurance, engineering, operations, training, and capabilities development.

Strategic procurement and contract expertise: Served as a key member of aircraft acquisition committees and participated in defense contract negotiations with major defense companies, contributing to high stakes decision making on fleet modernization and capabilities enhancement. Extensive experience managing relationships with international and local contractors and companies ensuring seamless coordination and delivery of complex aviation projects.

AI innovation leadership: Since October 2025, serving as Team Leader for AI Projects within the organization. Successfully developed and deployed an AI enabled application that integrates with the current correspondence system that has been formally adopted organization wide, demonstrating ability to adapt, and deliver scalable solutions that enhance organizational efficiency.

Expertise spans project leadership proven in aircraft modifications, and fleet modernization projects, and human resources management in workforce planning, hiring, and talent development. Demonstrated ability to deliver mission critical results in high stakes environments, including three international deployments totaling over 20 months. A strategic problem solver with deep technical acumen and a passion for operational excellence, now transitioning into leadership roles that leverage military and engineering discipline, people management, and organizational transformation.

PROFESSIONAL EXPERIENCE

AI Team Leader · *2025 – Present*

- Played a key role in developing and implementing an AI-enabled correspondence system that integrated with an existing organizational platform, resulting in organization wide adoption and significant reductions in administrative workload and processing time

Field Maintenance Company Commander · *2025 – Present*

- Coordinated collaborative efforts with external contractors and OEM representatives to execute specialized repairs and aircraft modifications, enhancing sustainment effectiveness and operational capability.

- Served on an overseas deployment, leading personnel, resources, and operational activities to sustain mission readiness and support critical operational objectives.

SKILLS

| Strategic Leadership

| Human Capital Management

| Workforce planning

| Performance management

| Production control

| Project management

| Resource Allocation & Optimization

| Process Improvement

| Strategic Procurement

| Contract Management

| Technology Adoption

| Technical Proficiency: Microsoft Word, Excel, Power Point

Field Maint. Company Deputy Commander · *2021 – 2025*

- Served as a key member of an aircraft acquisition program, supporting planning, evaluation, coordination, and implementation activities to facilitate successful capability delivery.
- Coordinated and supported a short notice VIP overseas mission, rapidly mobilizing cross functional resources to ensure mission readiness and successful on time execution.
- Supported planning and execution of aircraft modification programs, ensuring timely delivery, risk mitigation, and alignment with operational requirements.

Field Maintenance Platoon Commander · *2020 – 2021*

- Supported overseas deployment operations in a leadership capacity, contributing to the successful delivery of mission critical objectives through effective planning, coordination, and execution.
- Developed and implemented a strategic technical training plan that maximized workforce readiness and skill development despite human capital being dispersed across multiple deployments and operational locations.
- Optimized aircraft phase maintenance planning under spare parts and technical support constraints, improving fleet availability and operational continuity.

Maintenance Officer · *2019 – 2020*

- Delivered and sustained fleet readiness exceeding 80% in a resource constrained environment through proactive maintenance management.
- Played a key role in a major aircraft modification project, contributing to accelerated aircraft delivery through effective coordination of technical activities, and issue resolution.
