

SAEED ALSEREIDI

alsurady30@yahoo.com | +971 50 303 0242 | Abu Dhabi, United Arab Emirates | Emirati National

Strategy and PMO professional with an Aerospace engineering foundation, supporting executive leadership across strategic planning, performance management, governance, and strategy execution in the Ministry of Defence. Combines consulting experience (Oliver Wyman; Kearney-delivered transformation program) with hands-on delivery of governance frameworks, executive reporting. Twice selected for competitive national leadership programs.

PROFESSIONAL EXPERIENCE

2025 – Present Jahizoun – Future Leaders Program, UAE

Prestigious, selective MoD national leadership development program focused on strategy, consulting, transformation, and sector excellence.

Strategic Management & PMO – Executive Office of Ministry of Defence (4 months, current rotation)

- Provide strategic advisory support to senior leadership on organizational priorities and transformation initiatives; support strategic planning, performance management, governance, and execution-monitoring activities
- Coordinate strategic initiatives and monitor progress against key objectives, supporting annual planning, reporting, and performance assessment cycles
- Develop governance frameworks, coordination mechanisms, and operating models, including strategic management assessments and annual report methodology
- Develop executive briefings, leadership updates, and management presentations; support leadership meetings through agenda preparation, action tracking, decision support, and follow-up coordination
- Lead the development of methodologies, templates, trackers, stakeholder databases, and reporting tools underpinning PMO processes and performance reviews
- Conduct benchmarking of leading practices; contribute to organizational excellence, capability development (incl. skill-gap assessments), and coordination across multiple government entities

Consultant (Secondment) – Oliver Wyman

Department of culture & tourism (4 months)

- Developed strategic concepts, business cases, and implementation roadmaps for new public sector programs (E.g. Museums); created executive dashboards and performance-tracking solutions
- Conducted market research, benchmarking, and strategic assessments; facilitated workshops with senior leaders and prepared executive-level presentations and recommendations

Energy & Infrastructure Projects (2 months)

- Contributed to a strategic roadmap for electric vehicle charging infrastructure across multiple emirates, supporting deployment strategy, investment prioritization, and government-industry stakeholder coordination
- Supported strategic planning and project management for national energy programs; developed analytical materials for executive review

2024 – 2025

Trainee Consultant in MoD– KHUTWA Program (delivered in partnership with Kearney)

- Contributed to multiple large-scale MoD transformation projects across technology, logistics, and finance workstreams
- Supported the activation of four newly established specialized national capability centres and coordinated alignment with the central modernization project office
- Developed job descriptions for new organizational structures and assessed outsourcing of supply and transportation services for logistics
- Conducted research, benchmarking, and gap analyses to inform leadership decisions; facilitated workshops and presented findings to senior stakeholders

2021 – 2022

Halcon Systems, UAE

Junior Engineer

- Contributed to advanced aerospace systems R&D and testing, with a focus on design and reliability improvements; certified in ANSYS Motion, SpaceClaim, and Meshing

EDUCATION

2021 Khalifa University, UAE – BSc in Aerospace Engineering

2016 High School Diploma, UAE – 97.9% average

ADDITIONAL INFORMATION

- **Leadership Programs:** Jahizoun – Future Leaders Program; KHUTWA Program with Kearney
- **Certifications:** ANSYS Motion, SpaceClaim, ANSYS Meshing
- **Skills:** Strategic Thinking and Problem Solving, Data Analysis and Reporting (Microsoft & AI), Strong leadership skills Decision making, Engineering Design (SolidWorks, ANSYS, CFD, MATLAB, C++)
- **Languages:** Native Arabic; fluent English
