PROFESSIONAL SUMMARY

Results-oriented Engineering Manager with a master's degree in engineering management and a proven track record of leading high-performing technical teams across 7+ major upgrade projects. Expert in guiding cross-functional groups through the entire project lifecycle—from initial contract signing and Critical Design Reviews (CDR) to final deployment, logistics, and user training.

PROFESSIONAL EXPERIENCE

Ministry of Defense | Project Manager | 2022 – 2026

- Portfolio Oversight: Orchestrated the lifecycle of 7+ major engineering projects, managing diverse scopes from initial kickoff and contract execution to final delivery.
- Strategic Governance: Led Critical Design Reviews (CDR) and technical gate reviews to ensure system upgrades met 100% of operational and security requirements.
- Logistics & Contract Management: Managed complex procurement cycles and contract signing, ensuring seamless supply chain integration and vendor accountability.
- Crisis Management: Directed project continuity strategies during global disruptions (COVID-19), managing resource reallocation and the controlled suspension/safeguarding of project assets.
- Feasibility & Innovation: Conducted Technical Feasibility studies and Proof of Concepts (PoC) to validate new product experiments and innovative technologies before full-scale deployment.
- Workflow & Process Mapping: Optimized operational efficiency by modeling "As-Is" vs. "To-Be" workflows, eliminating bottlenecks in the upgrade and modification lifecycle.
- User Adoption: Designed Training Needs Analysis (TNA) and end-user communication roadmaps to minimize learning curves and ensure a smooth transition to new technologies.

Science and Engineering Service, USA | Project Manager | 2024

- Technical Modification: Managed complex system modification projects, focusing on engineering design integrity and performance enhancement.
- Obsolescence Management: Developed innovative solutions for obsolete parts, sourcing alternatives and engineering retrofits to extend equipment lifecycle and operational readiness.

Global Aerospace Logistics (GAL) | Operational Officer | 2022

- Process Optimization: Monitored Quality Standards and tracked KPIs to optimize R&D workflows and overall operational efficiency.
- Operational Excellence: Streamlined internal processes to ensure aerospace maintenance met international certification and safety standards.

Al Taif | Trainee | 2019

- Gained hands-on experience in New Product Development (NPD) and the maintenance, repair, and overhaul (MRO) of heavy mechanical systems.

EDUCATION

Abu Dhabi University | Master of Engineering Management | 2025

- *Key Coursework:* Supply Chain Management, Strategic Management, Quality Engineering, Operation Research & Simulation, Advanced Engineering Economics.

Khalifa University | Bachelor of Mechanical Engineering | 2020

- *Key Coursework:* Engineering Design, UAV Modeling, Control of Mechanical Systems, Design for Manufacturability, Aviation Management.

TECHNICAL SKILLS & LANGUAGES

- **Leadership & Strategy**

Program Governance

Defense Systems Modernization

Risk & Crisis Management

- Technical & Engineering

CAD / Ansys / MATLAB

System Modification & Retrofit

- Operational & Commercial

Contract Negotiation

Vendor & Supply Chain Leadership

- Languages:

Arabic (Native), English (Proficient), Russian (Beginner).
