Saeed Salem Alshebli

Senior Software Engineer · AI & Cloud Solutions

Abu Dhabi, United Arab Emirates
+971 50 337 9737 | saeedalshebli1994@gmail.com

PROFESSIONAL SUMMARY

Results-driven Software Engineer with over eight years of experience designing, developing, and deploying secure, large-scale enterprise applications across government and mission-critical environments. Holder of a Master of Science in Software Engineering (GPA 3.91, with Excellence) with a thesis focused on Natural Language Processing and applied Artificial Intelligence. Proven expertise in microservices architecture, RESTful API design, cloud deployment, and end-to-end project delivery. Combines a strong engineering background with a passion for AI/NLP research and a track record of translating complex requirements into reliable, scalable, and user-focused solutions.

EDUCATION

United Arab Emirates University (UAEU) — Al Ain, UAE 2022 – 2024

Master of Science in Software Engineering

- Graduated **with Excellence**; cumulative GPA **3.91** / **4.00**.
- Thesis in Artificial Intelligence and Natural Language Processing (NLP), focusing on modern language-model architectures and their real-world applications.
- Coursework: Advanced Software Architecture, Distributed Systems, Machine Learning, Research Methods.

United Arab Emirates University (UAEU) — Al Ain, UAE 2012 – 2017

Bachelor of Science in Computer Science — Software Development Track

- Cumulative GPA **3.37** / **4.00**.
- Capstone work covered full-cycle application development, database design, and software engineering practices.

Albeed'a High School — Al Ain, UAE 2010 – 2012

High School Certificate — Scientific Stream

- Final average: **89.2%**.

PROFESSIONAL EXPERIENCE

Ministry of Defense — IT Department, Software Development Team 2017 – Present

Software Engineer

- Design, build, and maintain secure enterprise-grade web applications using **Java (Spring Boot)** and **C# (.NET)**, serving internal users across multiple departments.
- Led the migration of monolithic services to a **microservices architecture** with Spring Boot, improving deployability, fault isolation, and team velocity.
- Designed and developed **RESTful APIs** with clear contracts, versioning, and thorough validation; tested integrations end-to-end using **Postman** and automated test suites.
- Containerized applications with **Docker** and deployed them on **DigitalOcean**, AWS, and Azure; configured CI-friendly build pipelines and environment-specific configuration.

- Trained, evaluated, and deployed **Machine Learning and NLP models** on cloud platforms, including text classification and language-understanding components used in internal tooling.
- Engineered an **IoT-based smart-lock system** integrated with cloud services, covering device communication, secure authentication, and a control dashboard.
- Owned full project life cycles — requirements gathering, analysis, design, implementation, QA, and deployment — while collaborating with cross-functional stakeholders.
- Conducted **QA testing**, performance profiling, and security hardening to meet strict government compliance and reliability requirements.
- Mentored junior developers, reviewed code, and contributed to internal engineering standards and documentation.

SELECTED PROJECTS

NLP Master's Thesis — Applied Language Models 2023 – 2024

- Researched and benchmarked modern NLP models on real-world language tasks.
- Designed the experimental pipeline (data preparation, training, evaluation) using Python and standard ML stacks.
- Defended the thesis successfully and graduated with Excellence.

IoT Smart-Lock System — Cloud-Connected Access Control Workplace project

- Built an end-to-end smart lock: embedded device, secure cloud backend, and user-facing controls.
- Implemented authentication, event logging, and remote access management over RESTful APIs.

Enterprise Microservices Platform Workplace project

- Split a legacy monolith into independently deployable Spring Boot services with clear domain boundaries.
- Standardized API design, error handling, and observability across services.

TECHNICAL SKILLS

Languages: Java, C#, Python, SQL

Frameworks: Spring Boot, .NET

Architecture: Microservices, RESTful APIs, MVC

Cloud: AWS, Azure, DigitalOcean

DevOps & Tools: Docker, Git, Postman

Databases: Oracle, SQL Server

AI / ML: NLP, model training, Google Colab, Kaggle

IoT: Smart-device integration, cloud control

Methodology: Agile / Scrum, project documentation

Design: Figma, Canva, Adobe Photoshop

Quality: QA testing, performance optimization

Languages spoken: Arabic (native), English (fluent)

AREAS OF INTEREST

Applied Artificial Intelligence and Natural Language Processing; large language models and their enterprise applications; secure cloud-native architectures; and IoT systems integrated with intelligent backends.

ADDITIONAL INFORMATION

Nationality: United Arab Emirates **Date of Birth:** 9 April 1994 **Driving License:** UAE
Availability: Upon notice
