Abdulla Yousef Mohammed Shahin Ahmed
Mechanical Engineer

United Arab Emirates, Dubai • ayshahin42@gmail.com • +971-50-775-2227

PROFESSIONAL SUMMARY

Results-driven Workshop Engineer with 6 years of experience in maintaining and managing high-value Naval Systems. Proven track record in maintenance operations, new project planning, and long-term technical strategy. Recognized for achieving 95% preventive maintenance efficiency in 2024 and designing a decade-long spare parts forecasting model. Adept at leading cross-functional teams, solving complex engineering problems, optimizing workflows, and ensuring system reliability. Now seeking to lead innovative engineering projects that shape the UAE's Defence industry.

WORK EXPERIENCE

UAE NAVY Main Workshop Engineer
UAE Ministry of Defence – Abu Dhabi, UAE

Febraury 2020 - Present

- Lead engineer in the UAE NAVY main workshop, managing a multidisciplinary team of 30 technicians responsible for confidential military-grade systems.
- Supervised preventive and corrective maintenance operations, ensuring optimal system availability and operational readiness.
- Oversaw multiple high-level maintenance and upgrade projects across MOD platforms, aligning with defense objectives and timelines.
- Coordinated with international OEMs for mission-critical solutions, minimizing equipment downtime and supporting national defense readiness.
- Planned and implemented training courses for technicians and engineers, improving technical competence and performance across the department.
- Maintained documentation, compliance records, and spare parts logistics in line with MOD protocols.

MARINE ENGINEER – NAVAL OPERATIONS
UAE Ministry of Defence – Abu Dhabi, UAE

May 2017 – Febraury 2020

- Served as a Marine Engineer Officer (MEO) aboard naval vessels, responsible for the full operation, maintenance, and safety of all onboard engineering systems.
- Conducted routine inspections, troubleshooting, and repairs of propulsion, power generation, and auxiliary systems in challenging maritime conditions.
- Ensured vessel readiness by performing critical maintenance procedures aligned with naval protocols and international standards.
- Collaborated with the ship's crew and command officers to maintain safe, efficient, and mission-ready operations.
- Managed spare parts inventory and maintenance logs to ensure operational continuity at sea

EDUCATION

Cranfield University (UK) & Rabdan Academy (UAE) – Dual Degree
Cranfield, UK & Abu Dhabi, UAE
2022 – 2023
Master of Science in Systems Engineering (Defense Systems)
GPA: 74.1 (Cranfield)
Thesis: Applying Systems Engineering Discipline in the Pre-concept and Concept Stages for the UAE Ministry of Defence

Tennessee Technological University
Cookeville, TN, USA
2012 – 2016
Bachelor of Science in Mechanical Engineering

SKILLS

Key Skills: Maintenance Planning & Execution, Preventive & Predictive Maintenance, Root Cause Analysis, Team Leadership & Supervision, Technical Troubleshooting, Spare Parts Forecasting, New Project Coordination, Equipment Reliability Improvement, Safety & Compliance Standards, Communicating with International OEMs, Providing Innovative Solutions with OEM Support During Critical Situations, Continuous Improvement Initiatives

Technical Skills: MATLAB, Microsoft Office, Word, Excel, and PowerPoint.

CERTIFICATION

- Multiple certifications in advanced defense systems, engineering methodologies, and maintenance operations. (Details withheld due to confidentiality)

LANGUAGES

- Arabic – Native
- English – Fluent

PROJECTS & ACHIEVMENTS

- Selected to support the UAE official team at COP28 (2023), contributing to organizational efforts and national representation for a two-month period.
- Participated in multiple high-level, classified defense engineering and innovation projects under the UAE Ministry of Defence (details withheld due to confidentiality)
