

WALEED AL MANSOORI

Senior Product Owner – Secure Communication & Edge Device Solutions

Emirati National | Abu Dhabi, UAE | +971 56 599 1995 | waleed@almansoori.me

EXECUTIVE SUMMARY

Senior Product Owner in secure communications, managing a portfolio of network-encryptors across their full lifecycle. Owns solution definition end to end, translating customer requirements into high-level designs, deployment models, showcase-ready solutions while driving execution across engineering, QA, and customer-facing teams. Combines deep grounding in secure connectivity with executive stakeholder engagement and a working focus on solutions that are production-ready, repeatable, and commercially viable.

CORE COMPETENCIES

Solution Definition & High-Level Design (HLD) • Product Ownership & Lifecycle Delivery • Client Requirements Engineering • Cross-Functional Team Leadership • Stakeholder Engagement & Alignment • Client Presentations & Demonstrations • Customer Deployment Support • Network Encryptors • Connectivity & Secure Communications • Deployment Models & Field Validation • Customer Deployment Support

PROFESSIONAL EXPERIENCE

KATIM

Senior Product Owner

Jan 2025 – Present

- **Direct multiple concurrent product developments** across KATIM's portfolio of network encryptors, ensuring timely delivery against client requirements.
- **Lead the identification and gathering of client requirements**, keeping customer needs, product capabilities, and delivery execution in continuous alignment.
- **Shape solutions that answer clients' needs**, balancing customer requirements, technical feasibility, and delivery priorities.

Product Owner

Jan 2024 – Dec 2024

- Translated client requests into high-level designs (HLDs) and detailed product requirements.
- Led multiple cross-functional teams through the delivery cycle, ensuring the product shipped as specified and on schedule.
- Organized and chaired meetings with key stakeholders, aligning expectations at every stage of the delivery lifecycle.
- Established a structured task management and information flow across teams using the Atlassian suite.

QA Engineer

Sept 2023 – Dec 2023

- Executed manual test campaigns across the product line and produced executive-level quality reports.
- Validated multiple product configurations and deployment setups as complete, customer-ready solutions.
- Represented the product at industry events, presenting capabilities and live demonstrations to potential customers.

Associate Client Engineer

Aug 2022 – Sept 2023

- Managed client requests end to end and supported deployments of products in customer network environments.
- Worked alongside engineering teams to validate client requests and requirements.
- Researched and proposed solutions that accelerated and de-risked client deployments.

Digital14

Associate

Nov 2019 – Aug 2022

- Performed manual QA on Android-based connected devices and products.
- Automated part of the unit-testing workflow with a self-built Python script.
- Authored a training guide that enabled seamless knowledge transfer between internal departments.

EDUCATION

BASc. Information Technology – Security and Forensics

June 2019

Higher Colleges of Technology, Ras Al Khaimah, CGPA 3.99 / 4.0

Honors: Collaborative Leader, KATIM (May 2026) • 1st Place, Cryptography Competition, HCT RAK (Oct 2018) • 1st Place, Cyber Olympics, HCT Dubai (Mar 2018)

Languages: Arabic (Native) • English (Fluent in reading, speaking, and writing)
