Faris Saeed Salem Alkaabi

Abu Dhabi, United Arab Emirates faris.alkaabi@gmail.com 971-55-8330336 /falkaabi

SUMMARY

AI Architect & Cyber Systems Innovator with 8+ years of experience in Artificial Intelligence and Cyber Offensive Security. Operating at the intersection of cybersecurity, artificial intelligence, and sovereign digital infrastructure, leading teams in reverse engineering, designing, and developing advanced Cyber Defense systems. Adept in identifying security threats and vulnerabilities using strong analytical skills.

EXPERIENCE

Head of AI | UAE Ministry of Defense **September 2024 - Present, UAE**

- Leading several teams to build in-house automation & AI solutions, and unifying enterprise AI stack and applications.
- Providing technical consulting for multiple digital transformation and organizational excellence projects in cybersecurity, artificial intelligence, and information technology.
- Built a fully air-gapped Smart Chat application serving a vast pool of enterprise users, along with AI services platform to serve all internal systems with LLM capabilities.
- Orchestrated and deployed MOD's sovereign AI Cloud infrastructure using latest private cloud technologies.
- Optimized several systems to run leading LLM models on edge hardware solutions, with low compute resources.

Head of Programming | UAE Ministry of Defense **June 2022 - September 2024, UAE**

- Developed innovative Intelligent Systems and explored new AI & Cyber capabilities within the Executive Directorate of Telecommunication & Information Technology.
- Collaborated with cross-functional teams on the Ministry's Digital Transformation initiatives, and led the organizational change management team.
- Designed and Implemented a Smart Access Control system using custom multimodal authentication with face biometrics & LPR for the Smart Gate Platform.
- Built a remote-controlled digital system for a petrol-operated vehicle adaptable to user wireless inputs while ensuring secure communication and operational safety.
- Developed a secure, end-to-end encrypted data exchange between air-gapped networks using custom-built automation and tamper-proof hardware while ensuring complete isolation between the two networks.
- Conducted reverse engineering of multiple electronic devices.
- Supervised several key projects including: the Smart Bus, Smart Recruitment Platform and mobile apps, UGVs, USVs, Border Fence Monitoring System, Drone Fleet Management System, Training Hall Attendance System, Smart Studio, and others
- Structured national-level coding competitions for youth engagement and talent pipeline development.
- Delivered regular awareness lectures on artificial intelligence and smart solutions to MOD and Armed Forces personnel.

Senior Armament Staff | UAE Armed Forces **September 2019 - June 2022, UAE**

- Achieved first in class honors in Field Engineer Platoon Commander course and Explosive Ordnance Disposal (EOD) Level 1 course (2020).
- Served as the Executive Assistant to the office of the commander of Field Engineering Group & 2nd Armament staff (2021-2022), contributing to the development of FEG capabilities and policies.
- Designed and developed Intelligent Systems and explored new capabilities for the Field Engineering Group.

Junior Engineer | STRATA Manufacturing PJSC **September 2017 - September 2019, UAE**

- Developed SOTA Business Intelligence & Data Analytics tools cutting the time for reporting from 1 month to 30 minutes.
- Integrated current Product Lifecycle Management into BI giving measurable strategic insights to higher managements.
- Established an interactive Digital Visual Management System to support daily business reports in all areas (Engineering, Quality, Production, Operations, HR, Finance).
- Supported the development of data-loader for the integration of new equipment into Strata 2 for the Boeing 787 VF.

• Developed Smart Solutions and explored Industry 4.0 Technologies in asset tracking and management.

• Supported the Engineering staff in day to day tasks.

Manufacturing Technology Graduate Intern | BAE Systems **August 2016 - December 2016, UK**
• Supported the integration of a robot system demonstrator by designing robot end of arm equipment for appropriate manufacturing tasks.

• Explored new manufacturing capabilities & Rapid Prototyping Techniques.

• Developed and establishing a Digital Visual Management System using Lean Six Sigma methodologies.

Undergraduate Teaching Assistant for CHE 494/598 Six Sigma Methodology/ Engineering Experimentation | Arizona State University **January 2016 - May 2016, AZ, USA**
• Guided and supported 180 students and assisted faculty during lectures, and evaluation of assignments & exams.

Summer Intern | GLOBALFOUNDRIES **June 2014 - August 2014, DE**
• Gained exposure on the Damascene Fabrication Process of semiconductors.

• Developed a uniform deposition layer on silicon wafers in the Chemical Vapor Deposition section of Fab 1.

EDUCATION

Master of Science, Computer Science (Concentration in Artificial Intelligence) **2024, UAE**
Khalifa University • Computer Vision & Adversarial Attacks on AI

Diploma, Military Sciences **2020, UAE**
Zayed the II Military College • first in class of three hundred officers

Bachelor of Science in Engineering, Chemical Engineering **2016, USA**
Arizona State University • Minor in Engineering Management • 3.33 GPA

High School Diploma **2010, UAE**
Institute of Applied Technology • Engineering Science • 4.00 GPA - 97.3%

SKILLS

Industry Knowledge:

Agile Methodologies, Lean Six Sigma, Business Intelligence (BI), Data Visualization, Data Analysis, Quality Control, Root Cause Analysis, Project Management

Cybersecurity, Offensive Attacks, Hacking, Obfuscation, Lateral Movement, Forensic Analysis, Firmware Analysis,

Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, Natural Language Processing,

Research, 3D Printing, Testing, Troubleshooting, Cloud Computing, Computer Science

Tools & Technologies:

Python, HTML, CSS, JavaScript, C++, Bash, PowerShell, PHP, Git, MATLAB, SQL, NoSQL,

Windows, MacOS, iOS, Linux, Kali Linux, Arduino, Raspberry Pi,

Hadoop, Spark, Dask, Node.js, Amazon Web Services (AWS), Google Cloud Platform (GCP), MongoDB, Elastic Search, Redis, Kafka, Docker, CloudFormation, Elastic Beanstalk, Lambda, DynamoDB, Kubernetes,

NumPy, Pandas, Jupyter Notebook, Matplotlib, PyTorch, TensorFlow, Keras, OpenCV, Scikit Learn, Django,

ChatGPT, Gemini, Claude, Grok, Qwen, Llama, MCP, Cursor

Interpersonal Skills:

Operational Excellence, Strategic Planning, Strategy, Leadership, Teamwork, Team Leadership, Public Speaking

Languages: Arabic, English
